

PRESENTATION

Cognitio: Revista de Filosofia, now in its 22nd year of existence, with broad success and national and international recognition of its quality and academic importance, is now a journal of continuous publication.

With special gladness we are now consolidating our project in this direction, which began in the middle of last year, following the trend that academic journals, in general, have been adopting.

*This project has had a considerable amplitude because it has involved, besides the graphic and visual reformatting of the journal, the absorption and integration of its sister publication **Cognitio-Estudios**, an equally recognized publication, which has been publishing works by young researchers and, to a much lesser extent, senior texts.*

*Evidently, along with the intense dedication of the **Cognitio** team, this change demanded a different timetable from the one that has been routinely followed over the years. Nevertheless, having overcome this stage, **Cognitio** resumes its path of specialized publication in its area of research, namely, classical pragmatism and its broad dialogue with themes that span the entire history of philosophy.*

*The inauguration of **Cognitio's** new stage as a continuous publication allows its editorial team to maintain the continuity of a longstanding work that has resulted in a level of publications that have made it a national and international reference in its field of research. To the readers, we reiterate our invitation that you continue to be with us in this new stage of **Cognitio's** existence.*
