

Editorial

As mentioned recently by Jerry Glenn, co-founder and director of The Millennium Project: “The world is in race between implementing ever-increasing ways to improve the human condition and the seemingly ever-increasing complexity and scale of global problems”. Moreover, even though Steve Jobs had left us, India is already offering Wi-Fi Tablets with google android at US\$45 that soon may even run on solar-energy. Germany on the other hand is moving fast to replace its 25% energy coming from Nuclear Plants for alternative renewable energy sources, like solar energy as may be foreseen by the Desertec Foundation; and China is becoming a leader regarding Green Economy and Green Jobs as indicated by the recent World Watch Institute Report.

Moving From Vision into Action was the main theme of the World Future Society Meeting this year giving an opportunity for people sharing ideas and visions that may be implemented in practical solutions for today and tomorrow problems and promoting collective innovative intelligence. Similarly this No. 3 of our Vol. 2 issue, also deals with specific cases that some may be considered best practices regarding implementing Innovation and Management at different places of origin of members attending the ICIM 2010; in particular includes experiences from China to Bangladesh, Cambodia and Thailand.
